### THE IB LEARNER PROFILE

The International Baccalaureate programme aims to develop internationally minded people who, recognizing their common humanity and shared guardianship of the planet, help to create a better and more peaceful world.

I explore ideas and issues that are locally and globally important, to get in-depth knowledge and develop my understanding in many areas.

I develop my natural curiosity and learn the skills I need to inquire. I enjoy learning and love to learn new things.

I think carefully and show initiative. I make good decisions and I'm a problem solver.

I confidently and creatively share my ideas with others in many ways, in more than one language. I listen to and work well with others.

I tell the truth and I'm fair. I respect others, and take responsibility for my actions and their consequences.

I appreciate my own culture and personal history, but I listen to and respect the ideas and thoughts of others. I try to look at things in more than one way.

I show that I care about the needs and feelings of others. I help others and I look after the environment.

I have confidence to be in new situations and try new roles, ideas, and strategies. I stand up for and explain the things I believe in.

I look after my mind and body. I do my best to stay healthy.

I think about my own learning. I know when I've done well, and when I could improve.

### WHAT ARE APPROACHES TO LEARNING?

Approaches to learning (ATL) are an integral part of an IB education and complement the learner profile, knowledge, conceptual understanding, global context and inquiry within any unit. Through ATL students develop skills that have relevance across the curriculum that help them "learn how to learn". ATL skills can be learned and taught, improved with practice and developed incrementally. They provide a solid foundation for learning independently and with others. ATL skills help students prepare for, and demonstrate learning through, meaningful engagements. They provide a common language that students and teachers can use to reflect on, and articulate the process of learning.

The MYP extends the 5 ATL skill categories into 10 developmentally appropriate clusters.

- ATL skills are interconnected; individual skills and skill clusters frequently overlap and are often relevant to more than one skill category.
- ATL skills focus on the process of learning, helping students to become confident, independent, self-managed learners for life.
- Teachers should teach skills explicitly, and students should have structured learning opportunities to practice them.
- Many ATL skills that have been learned and practised during a unit of work can be integrated in assessment through a variety of tasks and projects involving problem-solving, hands-on approaches (individually and in groups), as well as traditional testing. Assessments involving ATL often require students to use information from different sources critically and to make appropriate use of technology.

In the MYP specific ATL skills become an explicit focus for teaching and learning so that students begin to take responsibility for their own development. Over time, students can identify themselves and their competence in any learning strategy using terms like the following:

**Novice/beginning**— students are introduced to the skill, and can watch others performing it (observation)

**Learner/developing**— students copy others who use the skill and use the skill with scaffolding and guidance (emulation)

**Practitioner/using**— students employ the skill confidently and effectively (demonstration)

**Expert/sharing**— students can show others how to use the skill and accurately assess how effectively the skill is used (self-regulation)

# **ATL SKILLS EXPECTATIONS**

ATL Skill	MYP Skill	Overall Expectation for Grade Level							Overall Expectation for Grade Level					
	Indicators	MYP1	MYP2	MYP3	MYP4&5									
Communication	Communication Skills	$\stackrel{\wedge}{\sim}$	44	444	444									
Social	Collaboration Skills	☆	☆☆	***	***									
Self- Management	Organizational Skills	☆	44	444	***									
	Affective Skills	☆	<b>☆☆</b>	**	***									
	Reflection Skills	☆	<b>☆☆</b>	***	***									
Research	Information Literacy Skills	☆	44	444	***									
	Media Literacy Skills	☆	44	444	444									
Thinking	Critical Thinking Skills	☆	44	444	* * *									
	Creative Thinking Skills	☆	44	444	* * *									
	Transfer Skills	☆	77 77	***	444									

The chart below explains the ATL expectation system used:

Novice	☆
Learner	\$ \$
Practitioner	***
Expert	***

# **ATL SKILL LEVELS**

ATL Skill Levels						
Novice	Learner	Practitioner	Expert			
Beginning to understand; observes others performing the skill	Copies others who use the skill	Demonstrates the skill when asked	Performs the skill and shows others how to use the skill			
Needs high levels of scaffolding from teacher	Uses the skill with some scaffolding and some guidance	Uses the skill with minimal scaffolding	Uses the skill without scaffolding			
Errors are frequent	Conscious of performing the skill; identifies errors and corrects them with guidance	Corrects errors with some guidance	Performs the skill at a high level. Errors are corrected independently			
	Uses the skill only with known content and in known context	Uses the skill with different content or in different context	Uses the skill with unfamiliar content and in unfamiliar contexts
